ITシステムは使い勝手（ユーザビリティ）が命です

パッと見て直感的にアクセスできる、視覚的な楽しさ・わかりやすさがポイント

介護のケアシステム

The image displays several screenshots of the KCIS (Kansai Care Interface System) software interface, illustrating its user-friendly design and functionality for care management. The screenshots include:

- A dashboard with various service icons such as '記録' (Recording), 'Vital', '検査' (Examination), '薬' (Medicine), '食事' (Eating), '排泄' (Elimination), '入浴' (Bathing), '移動' (Movement), '睡眠' (Sleeping), '会話' (Conversation), and '休息' (Rest).
- A calendar view for shift management, showing '入浴' (Bathing) and '排泄' (Elimination) activities across different days and times.
- A patient status overview screen with a central diagram showing various care activities and their relationships.
- A graph showing care metrics over time, with a legend for '記録' (Recording) and '検査' (Examination).

In the foreground, a laptop displays the KCIS logo and a 'START' button, indicating the system's ease of use and accessibility.
